THE
University of Vermont
HEALTH NETWORK

The Genomic DNA test "NEXT STEPS"

1. If you would like **more information** or have concerns before getting the test, contact the Genomic Medicine Resource Center:
   Email: DNAtest@uvmhealth.org. or **Phone: (802) 847-8135.**

2. When you feel that you have enough information and are ready to get the Genomic DNA Test, **sign the "Clinical Genomic DNA Test Consent" form**. This one-page form is in the packet you received at your provider's office, or download one from https://uvmhealth.org/GenomicDNAtest. →

3. Mail or carry the **signed consent form to your health care provider's office**. They will scan it into your health record. You may request a copy for your records. You can also make a picture or scan of your signed consent form and upload it through your MyChart patient portal.

4. Your health care provider's office *may* give you two other forms to carry to the blood draw site. If so, please bring these forms with you when you go to get blood drawn for the test.:
   - The Genomic DNA Test Order Form from "Invitae," (signed by your provider) and
   - The UVM Medical Center "Alternative Laboratory" form (also signed by your provider).

5. Your health care provider will enter the Test Order into your health record and their **staff will notify you when you can go to get your blood drawn**.

6. Your blood may be drawn in your primary care provider's office, or at **any one of the following sites**:
   - UVM Medical Center Main Campus Phlebotomy at 111 Colchester Ave, Burlington, ACC Building, Main Pavilion, Level 2. Walk-in, no appointment needed. Call (802)847-5121 for hours.
   - UVM Medical Center UHC Campus Phlebotomy at 1 S. Prospect Street, Burlington, first floor lobby. Walk-in, no appointment needed. Call (802)847-5121 for hours.
   - UVM Medical Center Fanny Allen Campus Laboratory at 792 College Parkway, Colchester. Appointment required. Call (802) 847-8864 to schedule an appointment.
   - Porter Medical Center Laboratory at 115 Porter Drive, Middlebury. Walk-in, no appointment needed. Call (802) 388-4747 for hours.
7. The phlebotomist will draw two lavender-top tubes of blood, a total of two teaspoons. **If you have the two forms from item 4 above**, please give them to the person drawing your blood and ask that they be sent to the laboratory with your blood sample.

Your Genomic DNA Test results will arrive in about a month. Your health care provider's office will contact you when they are available to review with your provider.

Thank you for helping us make this process a success!

Sincerely,
The UVM Health Network Genomic Medicine Team, and Your Primary Care Provider's Team
