Being Safe with Your Medicine

Keep all medicine up high and out of reach of children.

Always take your medicine for the whole time that is written on the prescription label. Do not stop taking medicines early, even if you start to feel better.

Only use the cup, spoon or dropper that comes with the medicine. Do not use kitchen spoons or cups for medicine.

Some over the counter medicines are not safe for children. Ask your pharmacist, doctor or the Poison Center before giving any to your child.

Do not share your medicines with someone else.

Add the Poison Center phone number to your phone. It is 1-800-222-1222.
