

## UVM Health Network eConsults

Get the expertise and care from a specialist, as coordinated by your Primary Care provider.

With your consent, your provider initiates the eConsult with a specialist. No referral or scheduled appointment needed.

Your Primary Care provider discusses your care needs securely with a specialist.

Within one week, the specialist's care feedback is available on MyChart.

After reviewing the specialist's feedback, your provider will reach out to discuss your care plan with you.
