Blood Gas Testing Updates

On 11/6/2021, the UVMMC Laboratory will be updating the analytes and adding reference ranges (including pediatric reference ranges) for the following tests: Arterial Blood Gas, Venous Blood Gas, Cord Blood Gas-Arterial, and Cord Blood Gas-Venous. This change is part of the UVMHN standardization of laboratory reporting and reference ranges as part of the Wave II/III EPIC go-live. The test builds for the Cord Blood Gas tests will be updated with new BE and BD result components. The analytes and reference ranges for each of the aforementioned tests are as follows:

<td>POCT EC8 iSTAT, NICU Only</td>
</tr>
</tbody>
</table>

If you have any questions or concerns about these changes, then please reach out to the Medical Director of Clinical Chemistry (clayton.wilburn@uvmhealth.org).
