

# Molecular Vaginitis/Vaginosis—LAB17401

Effective Immediately: Reagent issues from early June have been resolved and UVMMC Lab again requires **ONLY** a single swab for this assay.

Clinicians should submit a single **Orange Aptima Multitest** swab (pictured below) for the Molecular Vaginitis/Vaginosis test.

This test includes results for:

- Candida species group
- Candida glabrata
- Trichomonas vaginalis
- BV (Bacterial Vaginosis)

For more information regarding this assay, please refer to the entry in the [UVMMC Online Test Catalog](#). Please contact Laboratory Customer Service at (802) 847-5121 with any questions.
