

Potential Delays to Bacterial ID & Susceptibility Results

UVMHC Microbiology was experiencing a technical issue which was delaying organism identification and susceptibility testing. Cultures are still in progress and organisms were being sub-cultured, so testing will resume now that the technical issue is resolved.

We should clear the backlog in 12-24 hours.

Please contact Christina Wojewoda, Vice Chair Clinical Pathology (802) 847- 5140 with questions or concerns.
