

TEST UPDATE

New SARS CoV2, Flu A/B, and RSV PCR Combination Test

UVMMMC

Effective 3/6/24, UVMMMC will begin offering a combination order to include SARS CoV2, Flu A/B, and RSV Detection by PCR. If a patient has symptoms consistent with a respiratory virus infection, all four viruses should be tested for. This new test will replace the Inpatient/Outpatient Influenza A/B, RSV PCR test (LAB3757). However, the standalone order for SARS CoV2 will still be available if the combination is not necessary based on patient symptoms.

New Orderable	Epic Code	Atlas Code	Mayo Access ID	Order LOINC	CPT Code
SARS CoV2, Flu A/B, RSV Detect by PCR	LAB17655	LAB17655	FAH6184	in process	87637
Result Component(s)	Epic Code	Atlas Code	Mayo Access ID	Result LOINC	Notes
Flu A RNA Result	12301002660	FLARES	FAH5835	85477-8	
Flu B RNA Result	12301002661	FLBRES	FAH5836	85478-6	
RSV RNA Result	12301002663	RSVRES	FAH5837	85479-4	
COVID-19 RT-PCR Result	12301011320	LRR11320	FAH5935	94500-6	
Specimen Requirements:					
Container	Specimen	Temperature	Collect/Submit Vol	Min Vol	Stability
Viral Collection Kit	NP Swab	Refrigerate	2 mL	1 mL	4 days

Orderable to be Discontinued	Epic Code	Atlas Code	Mayo Access ID	Order LOINC	CPT Code
Inpatient/Outpatient Influenza, RSV PCR	LAB3757	IOFLUR	FAH5834	in process	87631

Standalone Orderable	Epic Code	Atlas Code	Mayo Access ID	Order LOINC	CPT Code
COVID-19 Testing	LAB14319	LAB14319	FAH5932	94309-2	87635
