

# GET TO KNOW OUR GREENROOF

1. **BIKE RACKS:** Encourage zero carbon, zero fossil fuel transportation, and a healthy commuting alternative.

2. **PLUM GROVE:** Provides bird and insect habitat, as well as dappled shade. Freshly harvested plums are served in our cafeteria.

3. **SKYLIGHTS:** Allowing natural daylight into rooms below encourages a positive outlook, reduces need for artificial lighting and saves electricity.

4. **NATIVE SUGAR MAPLE:** Provides valuable habitat to birds and insects, provides shade to keep the roof cool and has beautiful fall color.

5. **MEADOW GRASSES:** Provide excellent habitat to birds and insects, while helping to keep the roof cooler in the summer, and warmer in the winter.

6. **KEBONY WOOD RAMP:** Kebony wood is treated without harmful chemicals and is a sustainable alternative to using rain-forest wood.

7. **NATIVE BLUEBERRY SHRUBS:** Provide habitat to birds and insects. Fresh picked Blueberries are served in our cafeteria.

8. **NATIVE RIVERBIRCH:** Provides shade and a sense of forest canopy for those looking through the skylight from below.

9. **KIWI VINES:** Provide shade beneath the pergola. Fresh picked Kiwis are served in our cafeteria.

10. **RAINWATER HARVESTING GARDEN SHED:** Rainwater is collected by the "V" shaped roof and stored in tanks for use in the vegetable garden.

11. **RAISED BED VEGETABLE GARDEN:** Gardening has therapeutic benefits. Fresh picked veggies are served in our cafeteria. Raised beds make them accessible to all.

12. **CHILDREN'S GARDEN:** An educational garden used to teach children about organic gardening and the connection to the food they eat.
