

Fletcher Allen offers comprehensive joint reconstruction and total joint replacement services for patients, using the latest techniques and treatments available. Our skilled team is dedicated to providing patients with the best possible care in a compassionate and comprehensive manner.

SERVICES

We have more than 50 years of combined orthopedic expertise in joint replacement. Our specially trained orthopedic surgeons successfully perform hundreds of joint replacement procedures each year.

As a university hospital, the care we provide is informed by the latest scientific knowledge, giving patients access to the newest treatments and procedures, including:

- Cartilage-enhancing treatments
- Advanced hip and knee replacements
- Hip and unicompartmental knee resurfacing
- Computer-assisted surgical navigation
- Gender-specific total joint implants
- Multimodal pain management protocols
- Full spectrum of evidence-based minimally invasive surgery
- Joint-preserving procedures

- Hip arthroscopy
- Revision surgery for failed or painful total joints

Patient-Centered Focus

We provide a personalized approach focused on the specific needs of each patient. We are committed to patient education and go out of our way to spend time with patients and answer any questions they have.

- New patient consultations are seen in 10 business days or less.
- Elective surgical procedures are scheduled within four weeks of medical clearance by the primary care provider.

State-of-the-Art Facilities

We are pleased to offer state-of-the-art facilities at our Orthopedic Specialty Center in South Burlington. Here, all of our orthopedic services are located under one roof with an added level of comfort and convenience, including on-site MRI services.
